

NITISH SHARMA

Senior Software Engineer - Mobile & Full-Stack

+918894170554 • me@nitish.sh • linkedin.com/in/nitishxyz • github.com/nitishxyz • India

Summary

Senior Software Engineer with 5+ years of experience building production mobile and full-stack products. Led a production migration from legacy React Native to Expo and the New Architecture across iOS and Android. Previously owned full-stack development for a map-based social app as it scaled to 87,000+ active users. Strong across React Native, Expo, TypeScript, Node.js, PostgreSQL, AWS, CI/CD, and native mobile integrations, with proof-of-work across mobile apps, developer tools, and crypto/payment products.

Experience

Ngrave

Remote

Senior Mobile Engineer

05/2025 - 04/2026

Hardware and software wallet company building secure self-custody products for digital assets.

- Led migration of the Liquid wallet from a legacy React Native stack to Expo and the New Architecture across iOS and Android.
- Worked through native dependency compatibility, build configuration, and platform-specific issues during the Expo migration.
- Improved mobile CI/CD workflows to make builds, testing, and release preparation more reliable across iOS and Android.
- Contributed to a production crypto wallet experience where correctness, security, and release quality were critical.

Suptho Inc

Remote

Full Stack Developer

09/2022 - 04/2025

Map-based social app for real-time discovery and local interactions.

- Owned full-stack development across web and mobile as Suptho scaled from early stage to 87,000+ active users.
- Built and maintained React Native mobile features, backend APIs, WebSocket services, and PostgreSQL data models across core product flows.
- Led AWS migration and backend reliability improvements to strengthen performance, observability, and cost efficiency.
- Shipped map-based social networking features across mobile and backend, including real-time interactions and location-driven product flows.

Sontse Technology

Tallinn, Estonia

React Native Developer

10/2021 - 08/2022

Dating and social app startup focused on profiles, matching, and early-stage mobile product development.

- Built the MVP for a dating and social app using React Native, helping take the product from concept to working mobile release.
- Set up the initial Firebase backend for authentication, data storage, and early product iteration before the platform later moved to AWS.
- Developed core mobile flows across onboarding, user profiles, social/dating interactions, and app navigation.
- Worked closely with the founding/product team to rapidly ship and refine the MVP experience.

Shapeman Technologies

Chandigarh, India

React Native Developer

09/2020 - 09/2021

Mobile and web consultancy building React Native apps for startups and client products.

- Built cross-platform mobile applications for iOS and Android using React Native for client projects at a mobile/web consultancy.
- Developed Dermacupid, a niche dating app for people with skin conditions, focused on inclusive profile discovery and social connection.
- Built reusable UI components and integrated third-party APIs to speed up delivery across multiple React Native projects.
- Worked across app screens, navigation, API integration, and release preparation for production mobile apps.

Education

Chandigarh Group Of Colleges

Chandigarh, India

Bachelor of Technology - Computer Science

01/2020 - 06/2023

Key Achievements

- | | | |
|---|---|---|
|  Scaled Suptho to 87,000+ active users
Owned full-stack development across web and mobile while improving backend performance and infrastructure reliability. |  Built Riven to \$50K+ in on/off-ramp volume
Shipped a mobile stablecoin payments and invoicing app that has processed \$50K+ in volume, validating demand for a crypto-native banking experience. |  Earned Honorable Mention at the Colosseum Cypherpunk Hackathon
Built Solforge, a local blockchain development suite with sub-second startup and a built-in AI assistant, and received an Honorable Mention at the Colosseum Cypherpunk Hackathon. |
|---|---|---|

Skills

Frontend/Mobile: React Native · Expo · Next.js · React · iOS · Android · Tanstack

Backend: REST APIs · WebSockets · PostgreSQL · Hono · Drizzle · Node.js · Bun

Cloud/Infra: AWS · Cloudflare · Docker · GitHub Actions · CI/CD · SST

Blockchain: Solana · SPL Tokens · Blockchain APIs

Languages: TypeScript · Rust · Go · Python · SQL · Bash/Shell

Tools: Ottocode · Cursor · Claude · Codex · Neovim

Projects

ottocode (ottocode.io) 10/2025

AI harness, multi-interface and provider-agnostic.

- Full stack, multi-platform AI suite spanning Web, Desktop, CLI, and TUI interfaces, with setup as an AI proxy for routing requests across providers (Claude, GPT, Gemini)
- Pluggable tool architecture enabling extensible, context-aware automation across all platforms

Riven (riven.cash) 01/2025

Mobile Payment and Invoicing App

- iOS and Android mobile app with on-chain payments, fiat rails, and invoicing delivering a banking-like experience for digital payments

solforge (solforge.sh) 11/2025

Local Blockchain Development Suite

- High-performance local development environment with sub-1-second startup, a full-featured RPC server, and built-in AI assistant powered by current LLMs; 50+ production releases shipped

react-native-argon2-turbo 01/2026

React Native Module

- React Native Turbo Module exposing native password hashing via JSI for synchronous, high-performance cryptographic operations on mobile without legacy bridge overhead
